

POWERING THE
DIGITAL ECONOMY

BioTech Streamlines Onboarding

Boomi Master Data Management helps Biotech manage growth and access

Challenges

- Complex new employee setups consumed hundreds of hours a month - limited growth
- Control of access is critical
- Inconsistent worker data across applications

How Partner Helped

- Hub design and spoke process templates speed implementation
- Proven process insured quality data load, successful testing and go live
- Kitepipe support team handled process and logic issues post go-live

Results

- Highly automated onboarding and set-up process saves hundreds of hours a month
- Worker data is consistent across applications, and access to sensitive data is managed and logged
- Additional applications are easily added to flexible hub and spoke model
